Chavdar Georgiev

Senior SAP BTP / Cloud Platform Engineer

Bulgaria | +359 897 973 112 | chvdr1@gmail.com

Professional Profile

Senior cloud platform and DevOps engineer with 25+ years in IT and 4+ years in SAP cloud environments and SAP BTP. Hands-on experience engineering SAP BTP landscapes, Cloud Foundry environments, platform services, API integrations, secure automation, application deployment workflows and CI/CD. Combines enterprise troubleshooting, software engineering background, technical leadership and collaboration with distributed teams.

Relevant Expertise

SAP BTP & integration: subaccounts, entitlements, Cloud Foundry, Service Manager, platform APIs, AppRouter/MTA deployment workflows, Integration Suite / Cloud Integration, OAuth2, REST APIs.

Engineering & delivery: Terraform, GitHub Enterprise, Concourse, Vault, GitOps, Kubernetes, Crossplane, Flux, CI/CD, Bash, Linux, troubleshooting, architecture and technical documentation.

Professional Experience

Senior DevOps Cloud Consultant | BST (NTT DATA Business Solutions) | Feb 2022–Present

SAP BTP platform engineering, cloud automation and enterprise DevOps across multiple engineering initiatives.

- Engineered SAP BTP landscape creation, configuration and lifecycle workflows with reusable Terraform modules, GitHub Enterprise, Vault and Concourse.
- Worked with SAP BTP subaccounts, entitlements, Cloud Foundry, Service Manager, platform services and REST APIs; supported application/service deployment workflows including AppRouter and MTA environments.
- Worked with SAP Integration Suite / Cloud Integration and API-based integration scenarios.
- Designed SAP ALM technical-user automation using OAuth2, REST APIs, validation, structured logging and approval-preserving workflows.
- Contributed to Kubernetes-native SAP BTP provisioning using custom resources, Crossplane, Flux and GitOps; investigated reconciliation and dependency issues.
- Collaborated with distributed engineering teams on architecture, technical requirements, operational troubleshooting and repeatable delivery.

Server Operations Team Lead | Experian, Nottingham / Remote | Jan 2021–Mar 2022

- Led distributed enterprise infrastructure operations, incident resolution, reliability improvements and stakeholder coordination.
- Maintained hands-on involvement in complex technical issues and operational decisions.

Lead Systems Engineer | Experian, Sofia | Jan 2019–Mar 2021

- Provided L3/L4 Linux engineering and proactive automation across large-scale environments.
- Improved reliability through root-cause analysis, configuration management and cross-team collaboration.

Senior Linux Systems Engineer | Experian, Sofia | Feb 2017–Dec 2018

- Enterprise Linux infrastructure, production support, Bash automation, incident/change/problem management.

DevOps Engineer | Reward Gateway UK, Sofia | Jan 2016–Feb 2017

- Automated AWS-based development infrastructure using Vagrant, Puppet, Bash and structured configuration.

Linux / UNIX System Administrator | HPE, Sofia | Jan 2014–Jan 2016

- Enterprise Linux/UNIX administration, troubleshooting and ITIL-based production operations.

Software Development, Linux, Networking & IT Management | Sep 1997–Dec 2013

- Software development (PHP, C/C++), shell scripting, Linux/UNIX, networking, infrastructure architecture and technical consulting.
- Earlier JavaScript teaching experience.

Education

Master of Science, Applied Mathematics and Informatics — University of Veliko Tarnovo (High Honors)

Ph.D.-level education with right to defense — University of Veliko Tarnovo
