

Chavdar Georgiev

Senior SAP BTP / Cloud Platform Engineer

SAP BTP | Cloud Foundry | Terraform | Kubernetes | Crossplane | Flux | GitHub Enterprise | Vault | CI/CD
Bulgaria | +359 897 973 112 | chvdr1@gmail.com

Profile

Senior Cloud Platform and DevOps Engineer with 25+ years of professional IT experience and 4+ years working with SAP cloud environments and SAP BTP.

Strong background in platform engineering, infrastructure automation, Linux, CI/CD and enterprise operations, with recent focus on SAP BTP provisioning and lifecycle automation, Cloud Foundry, Kubernetes-based platform architecture, GitOps and API-driven infrastructure.

Experienced in designing and implementing automation across SAP BTP landscapes using Terraform, GitHub Enterprise, Vault, Concourse, REST APIs and cloud-native tooling. Current work includes Kubernetes, Flux, Crossplane and declarative provisioning of SAP BTP resources.

Combines hands-on engineering with architecture, technical leadership, troubleshooting and stakeholder coordination across distributed enterprise teams.

Employment History

Senior DevOps Cloud Consultant - BST (NDBS), Sofia | February 2022 - Present

Senior engineering role focused on SAP BTP, cloud platform automation, infrastructure lifecycle management and enterprise DevOps.

SAP BTP Platform Engineering & Cloud-Native Provisioning - 2025-Present

Working on the evolution of SAP BTP infrastructure provisioning toward a Kubernetes-native, declarative platform model.

- Engineering SAP BTP infrastructure through Kubernetes custom resources and GitOps workflows.
- Working with Kubernetes, Flux, Crossplane and related cloud-native tooling for declarative resource provisioning and lifecycle management.
- Working with SAP BTP resources including subaccounts, Cloud Foundry environments, entitlements, Service Manager and platform services.
- Investigating and implementing Git-driven desired-state infrastructure workflows.
- Working with SAP BTP APIs and provider-based automation for platform resource management.
- Troubleshooting resource reconciliation, dependencies and provisioning flows across Kubernetes and SAP BTP.
- Contributing to platform architecture and engineering discussions around reusable infrastructure abstractions and automated service delivery.

SAP ALM API Automation - 2025-2026

Designed and implemented API-driven automation for SAP ALM technical-user provisioning and lifecycle workflows.

- Automated technical-user provisioning while preserving required human approval steps.
- Implemented OAuth2 authentication and REST API integrations.
- Automated retrieval and validation of provisioning templates and external domains.
- Implemented draft creation, owner assignment and submission-for-approval workflows.
- Built reusable automation functions and structured logging for operational troubleshooting.
- Worked with SAP APIs, authentication, validation and enterprise approval workflows.

SAP BTP Landscape Automation - 2022-2025

Designed and implemented automation for creation, configuration and lifecycle management of SAP BTP development and test landscapes.

- Developed reusable Terraform modules for SAP BTP subaccount and infrastructure provisioning.
- Integrated GitHub Enterprise, Terraform, Vault and Concourse into automated platform workflows.
- Implemented secure credential and service-user management across Vault, GitHub and automation pipelines.
- Automated landscape creation, verification and cleanup across multiple SAP engineering environments.
- Worked with SAP BTP Cloud Foundry environments and platform services.
- Supported BTP application and service deployment workflows, including AppRouter and multi-target application environments.

- Worked with SAP Integration Suite / Cloud Integration and API-based integration scenarios.
- Designed and maintained CI/CD workflows for repeatable infrastructure and platform delivery.
- Improved reliability and reduced manual effort in landscape provisioning and engineering onboarding.
- Collaborated with distributed SAP and cloud engineering teams on platform architecture and automation.

TOCC Cloud Integration - 2022

Technical investigation and coordination across hybrid cloud environments involving SAP BTP, AWS and related infrastructure.

- Investigated cross-cloud architecture and management automation.
- Contributed to integration and lifecycle-management approaches for distributed cloud landscapes.
- Worked across infrastructure, platform and application teams to identify automation opportunities and operational dependencies.

SAP GMP Cloud Support - 2022

Enterprise infrastructure engineering and operations in SAP environments.

- Linux systems engineering and troubleshooting.
- Infrastructure automation using Terraform, Ansible, Chef and Bash.
- System software and environment lifecycle management.
- Monitoring and virtualization support.
- Incident investigation and operational problem solving.

Server Operations Team Lead - Experian, Nottingham / Remote | January 2021 - March 2022

Technical and operational leadership within a large multinational enterprise environment.

- Led distributed infrastructure operations and engineering activities.
- Coordinated incident resolution, service reliability and operational priorities.
- Worked across technical teams, management and business stakeholders.
- Supported cost optimization, technical decision-making and people development.
- Maintained hands-on involvement in complex infrastructure and production issues.

Lead Systems Engineer - Experian, Sofia | January 2019 - March 2021

Senior Linux and reliability engineering across large-scale enterprise infrastructure.

- Provided L3/L4 engineering support across large Linux estates.
- Designed proactive fixes and automation to improve platform reliability.
- Improved configuration management, patching and operational processes.
- Reduced critical production incidents through systematic engineering and root-cause elimination.
- Worked as a technical bridge between UK management, Bulgarian infrastructure teams and product teams.
- Bash, Git, BMC BladeLogic and enterprise automation.

Senior Linux Systems Engineer - Experian, Sofia | February 2017 - December 2018

- Linux infrastructure engineering and enterprise production support.
- Automation and configuration management using BMC BladeLogic and Bash.
- Incident, change and problem management in large-scale environments.
- Reliability improvements and operational automation.

DevOps Engineer - Reward Gateway UK, Sofia | January 2016 - February 2017

- DevOps automation for development and infrastructure environments.
- AWS-based development infrastructure.
- Vagrant and Puppet automation.
- Bash scripting and configuration management.
- JSON/YAML-based infrastructure and application configuration.
- Collaboration with UK-based development and operations teams.

Linux / UNIX System Administrator - HPE, Sofia | January 2014 - January 2016

- Linux/UNIX systems administration and troubleshooting.
- Enterprise incident and change management.
- Configuration control and infrastructure maintenance.
- ITIL-based production operations.

Software Development, Linux, Networking & IT Management | September 1997 - December 2013

Multiple engineering, consulting and management roles covering software development, Linux/UNIX systems, networking and Internet infrastructure.

- Linux server architecture, administration and troubleshooting.
- Network engineering with MikroTik and Cisco technologies.
- Routing, VPN, QoS and firewall infrastructure.
- Bash/shell scripting and software development.
- PHP and C/C++ development.
- Web infrastructure and application hosting.
- Technical support and service delivery.
- Infrastructure architecture and IT management.
- Customer-facing technical consulting and troubleshooting.

Core Expertise

SAP BTP & Cloud Platforms: SAP Business Technology Platform (BTP); SAP BTP Subaccounts & Entitlements; SAP BTP Cloud Foundry; SAP BTP Services; SAP BTP APIs; AppRouter / MTA environments; SAP Integration Suite / Cloud Integration; API-driven platform automation

Platform Engineering & Infrastructure as Code: Terraform; Kubernetes; Crossplane; Flux / GitOps; Infrastructure lifecycle automation; Declarative infrastructure; Linux / UNIX

DevOps & CI/CD: GitHub Enterprise; GitHub Actions; Concourse; Git; Vault; Ansible; Chef; CI/CD architecture and automation; Bash / Shell scripting

Cloud & Integration: AWS; Azure exposure; REST APIs; OAuth2; JSON / YAML; Cloud integration; Enterprise platform troubleshooting

Engineering & Leadership: Platform Architecture; Site Reliability Engineering; Technical Leadership; L3/L4 Production Support; Incident & Problem Management; Root Cause Analysis; Stakeholder Management; Distributed Team Collaboration

Education

Ph.D. level education with right to defense

University of Veliko Tarnovo "St. Cyril and St. Methodius"

Master of Science - Applied Mathematics and Informatics

University of Veliko Tarnovo "St. Cyril and St. Methodius"

Graduated with High Honors

Languages

Bulgarian - Native | English - Professional working proficiency | Russian - Working proficiency
